SMART ROUTER

- Automated best execution across multiple Digital Asset Exchanges from our simple interface or APIs.

CUSTODY SOLUTION

- Private blockchain ledger provides a multi-signature custodian wallet service
- Private Ledger creates proxy tokens that represent real tokens on the platform
- Custody wallets are either held with a third-party qualified custodian or within the system linked to the ledger
- Clients create public wallets by entity or individual that correspond with private wallets
- Trades settle on private ledger are updated in real-time on public blockchain wallets
